# KASTOmaxcut AM 8x22

Q Zoom

KASTOmaxcut AM 8x22

Automatic high-performance bandsawing machine in gantry design for large material dimensions, slabs, ingot moulds, forged shafts, open-die forgings, marine crank shafts, shafts for turbines, large tools of all qualities and of material which is difficult to cut (e.g. titanium, Hasteloy, Inconel).

- The extremely robust design and the high rigidity of this large bandsaw guarantee good vibration absorption and herewith short cutting times.
- horizontal clamping devices, travelling hydraulically or by means of spindles
- Fully automatic adjustment of saw frame, according to the material's height via light scanner
- hydraulically pre-tensioned carbide slideways guiding of saw blade
- hydraulic and electronic monitoring of saw blade tensioning

Technical data

**KASTOmaxcut AM 8x22**

---

---

<b>Cutting range</b>	
Cutting range flat (H x W)	850 - 2.200 mm
Clamping range (horizontal)	1.200 - 2.200 mm
plate thickness (section)	6 - 200 mm
Minimal end-, rest plate thickness	15 mm

---

---

<b>Mass and height</b>	
on request	

---

---

<b>Performance characteristics</b>	
Saw motor, Power	75 kW

---

We reserve the right to make technical changes.
